E-Commerce Marketing and Advertising

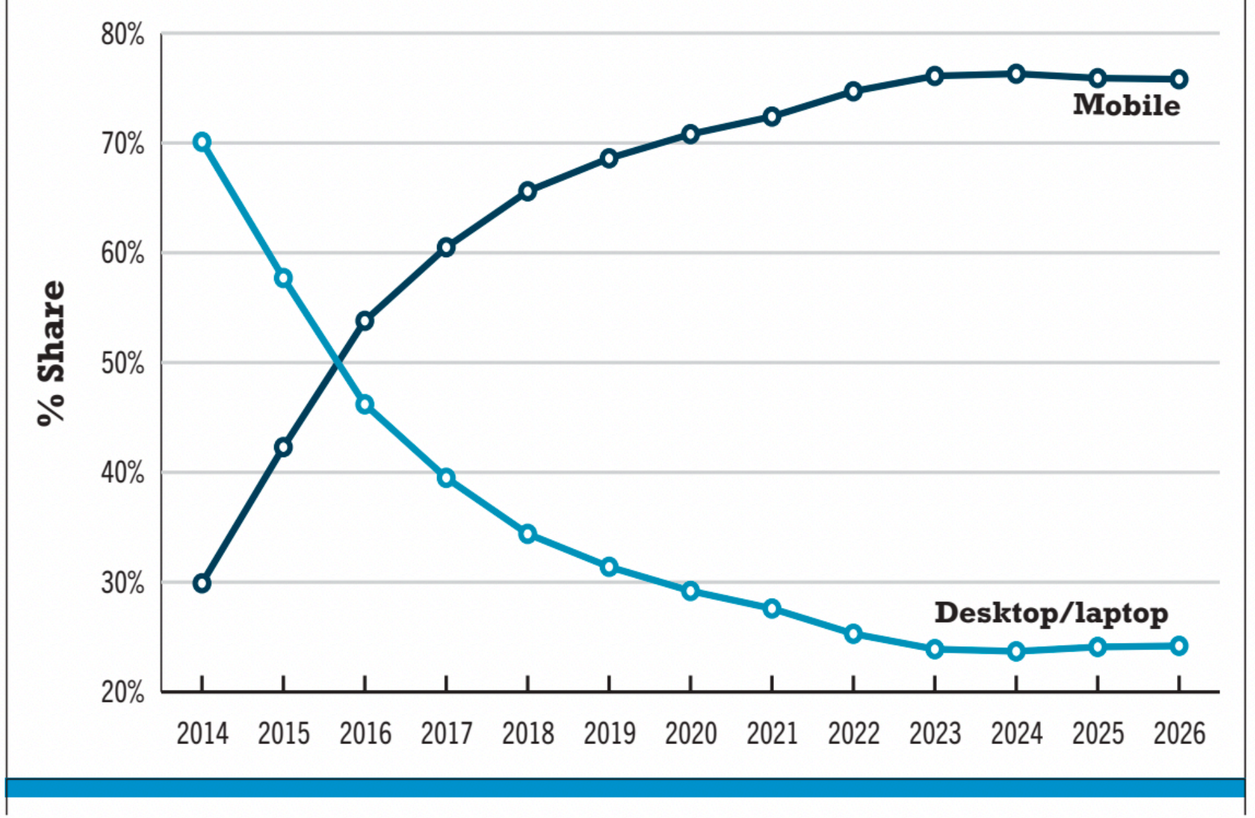
แนะนำ Social Marketing Process การทำการตลาดบน Facebook, Twitter และ Pinterest รูปแบบการทำ Mobile Marketing และ Location-based Marketing

Introduction to Social, Mobile, and Local Marketing

Social, mobile, and local marketing have transformed the online marketing landscape. Before 2007, Facebook was a fledgling company limited to college students. Apple had not yet announced the iPhone. Online marketing consisted largely of creating a corporate website, buying display ads on Yahoo, purchasing AdWords on Google, and sending e-mail. The workhorse of online marketing was the display ad that flashed brand messages to millions of users who were not expected to respond immediately, ask questions, or make observations. The primary measure of success was how many "eyeballs" (unique visitors) a website produced, and how many "impressions" a marketing campaign generated. An impression was one ad shown to one person. Both of these measures were carryovers from the world of television, which measures marketing in terms of audience size and ad views.

From the Desktop to the Smartphone and Tablet

FIGURE 7.1 THE RAPIDLY CHANGING TRAJECTORY OF ONLINE AD SPENDING WORLDWIDE



In 2023, mobile marketing is expected to account for more than 75% of all digital ad spending.

SOURCE: Based on data from Insider Intelligence/eMarketer, 2022a.

From the Desktop to the Smartphone and Tablet

Social, mobile, and local digital marketing are self-reinforcing and connected. Most social marketing occurs on the mobile platform because that is the method that most users use to access most social networks.

For instance, in 2020, 93% of Twitter's U.S. users accessed Twitter from a mobile device, with over 45% using only a mobile device. Mobile advertising generates the vast majority (about 93%) of Twitter's ad revenues. Likewise, about 95% of Facebook's U.S. users access Facebook from a mobile device, and over two-thirds are mobile-only members and over 95% of Facebook's U.S. ad revenues are generated by its mobile audience.

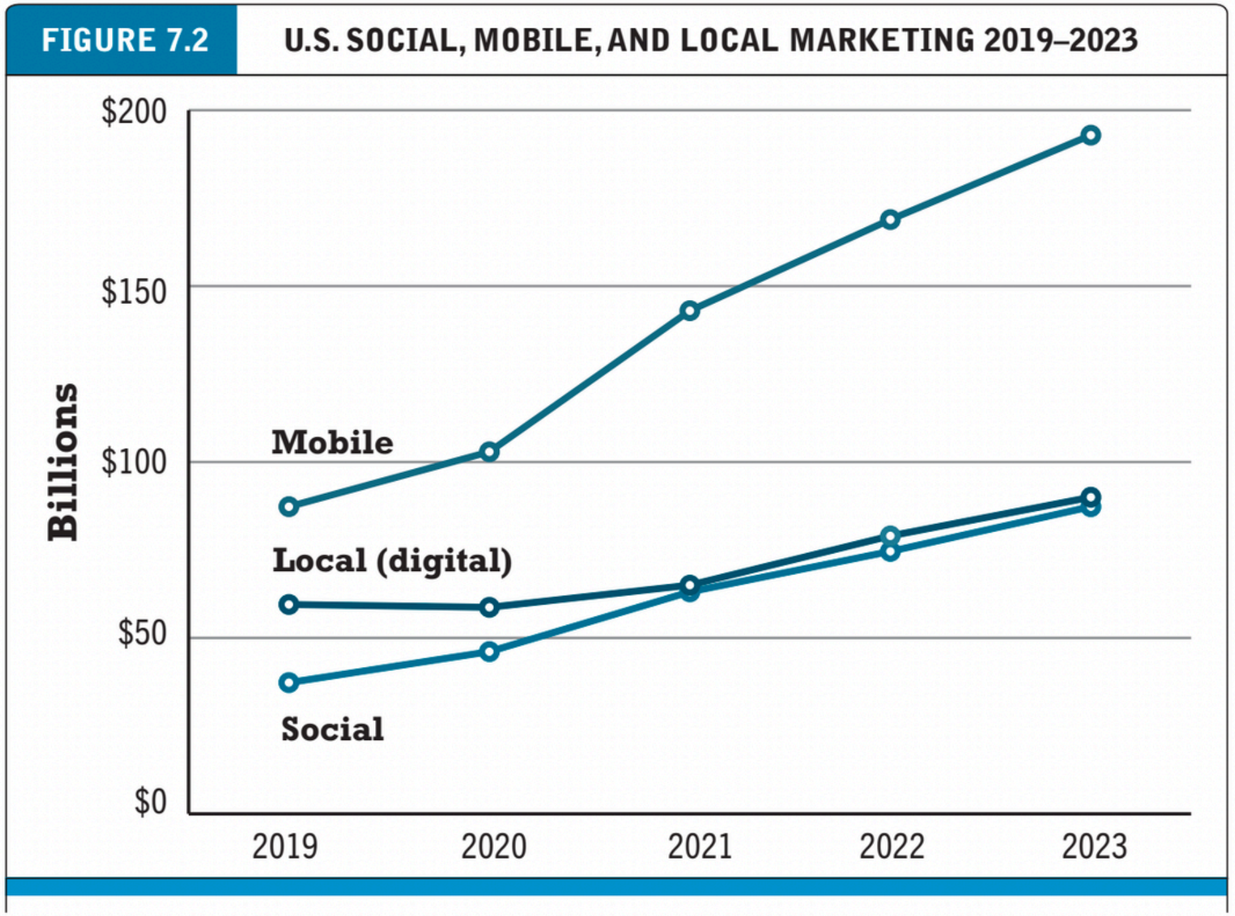
From the Desktop to the Smartphone and Tablet

Local marketing and mobile are highly related: local advertisers most often target mobile devices. And a considerable amount of mobile ad spending comes from local advertisers.

As mobile devices become more widely adopted, they can be used by customers to find local merchants, and for merchants to alert customers in their neighborhood to special offers. The strong ties among social, mobile, and local marketing have significant implications for managing your own marketing campaign. The message is that when you design a social marketing campaign, you must also consider that your customers will be accessing the campaign using mobile devices, and often they will also be looking for local content.

Social-mobile-local must be seen in an integrated marketing framework.

From the Desktop to the Smartphone and Tablet



Both mobile and social advertising spending are expected to more than double from 2019 to 2023.

SOURCES: Based on data from Insider Intelligence/eMarketer, 2022b, 2022c; BIA Advisory Services, 2019, 2020, 2021, 2022; authors' estimates.

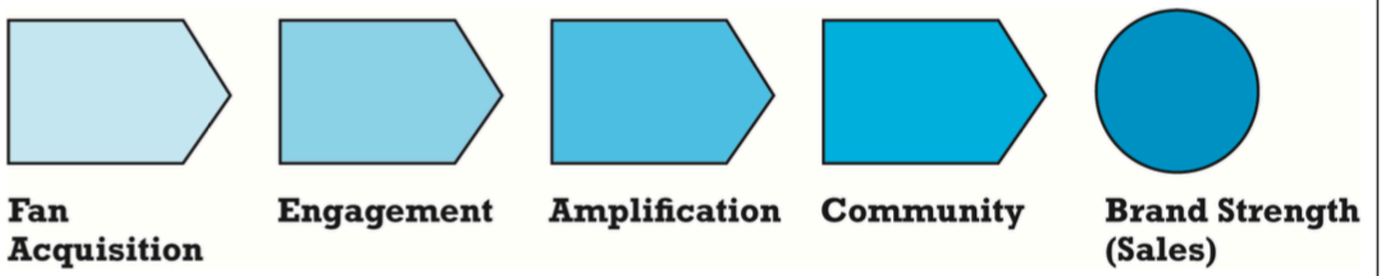
Social Marketing

Social marketing differs markedly from traditional online marketing. In social marketing, the objective is to encourage your potential customers to become fans of your company's products and services, and engage with your business by entering into a conversation with it. Your further objective is to encourage your business's fans to share their enthusiasm with their friends, and in so doing create a community of fans online. Ultimately, the point is to strengthen the brand and drive sales, and to do this by increasing your "share of online conversation." There is some reason to believe that social marketing is more cost effective than traditional marketing although this is still being explored.

Social Marketing Process

There are five steps in the social marketing process: Fan acquisition, engagement, amplification, community, and brand strength (sales). Each of these steps in the process can be measured. The metrics of social marketing are quite different from those of traditional web marketing or television marketing. This is what makes social marketing so different—the objectives and the measures. This will become more apparent as we describe marketing on specific social networks.

FIGURE 7.4 THE SOCIAL MARKETING PROCESS



Social Marketing Process

Social marketing campaigns begin with **fan acquisition**, which involves using any of a variety of means, from display ads to News Feed and page pop-ups, to attract people to your Facebook page, Twitter feed, or other platform like a web page. It's getting your brand "out there" in the stream of social messages. Display ads on social networks have a social dimension (sometimes called "display ads with social features" or simply "social ads"). Social ads encourage visitors to interact and do something social, such as participate in a contest, obtain a coupon, or obtain free services for attracting friends.

Social Marketing Process

The next step is to generate **engagement**, which involves using a variety of tools to encourage users to interact with your content and brand. You can think of this as "starting the conversation" around your brand. You want your fans to talk about your content and products. You can generate engagement through attractive photos, interesting text content, and blogger reports, with plenty of opportunities for users to express opinions.

Companies often turn to **influencers**, people who have dedicated followers on social media and who are viewed by those followers as trusted experts or celebrities, to generate additional engagement. Today, **influencer marketing** has become a subset of social media marketing, in which brands seek to leverage the trust influencers have built up with their following to generate brand awareness and engagement, and ultimately trans- late recommendations and product mentions from influencers into sales.

Social Marketing Process

Once you have engaged visitors, you can begin to use social network features to amplify your messages by encouraging users to tell their friends by clicking a Like but- ton, sharing a post, or by sending a message to their followers on Twitter. **Amplification** involves using the inherent strength of social networks.

For marketers, this means that if they can attract one fan and encourage that fan to share his or her approval with his or her friends, the message can be amplified twenty times: 20 friends of the one fan can be influenced. Best of all: the friends of fans are free. Marketers pay to attract only the initial fan and they are not charged by social networks (currently) for the amplification that can result.

Social Marketing Process

Once you have gathered enough engaged fans, you will have created the foundation for a **community**—a more or less stable group of fans who are engaged and communicating with one another over a substantial period of time (say several months or more). Marketers have a number of tactics to nurture these communities, including inside information on new products, price breaks for loyalty, and free gifts for bringing in new members.

The ultimate goal is to enlarge your firm's "share of the online conversation." The process ends with **strengthening the brand** and, hopefully, additional sales of products and services.

Social Marketing - Result Measuring

TABLE 7.1 MEASURING SOCIAL MARKETING RESULTS

SOCIAL MARKETING PROCESS	MEASUREMENT
Fan Acquisition (impressions)	The number of fans/followers and monthly growth. The number of people exposed to posts and other content. The percentage of those exposed who become fans/followers. The ratio of impressions to fans/followers.
Engagement (conversation rate)	The number of users who responded to brand content. The number of posts, comments, and responses to brand content. The number of views of brand content. The number of "Likes" generated per visitor. The number of minutes on average that visitors stay on your brand or product page (duration). The rate of Likes per post or other content (applause rate).
Amplification (reach)	The percentage of Likes, shares, or posts to other sites (the rate at which fans share content).
Community	The monthly interaction rate with your content. The average monthly on-site minutes for all fans/followers. The ratio of positive to negative comments.
Brand Strength/Sales	The number of leads generated (people who sign up for news or content). Visitor/lead rate: the number of visitors that become leads compared to the number resulting from other campaigns. The percentage (or revenue) of your online sales that is generated by social network links compared to the percentage generated by other platforms, such as e-mails, search engines, and display ads. The percentage of social network–sourced customer purchases compared to other sources of customers (conversion ratio). The conversion ratio for friends of fans/followers.

Live-Selling : the brightest business opportunity

Facebook Marketing

There are power users who spend hours a day on Facebook, some with thousands of "friends," and there are casual users who have a small set of perhaps 20 friends and relatives. While most have a basic understanding of Facebook, it's worthwhile to review the major features of Facebook before discussing its marketing potential.

TABLE 7.1 BASIC FACEBOOK FEATURES

FEATURE	DESCRIPTION
Profile	As part of account creation, you create a profile that includes certain personal information. The profile may also include photos and other media. Establishes baseline information that will be shared with friends.
Friend search	Helps you find friends who are already using Facebook, as well as friends who are not, typically by searching your e-mail contact list. Creates your baseline social network based on prior contacts.
Timeline	A history of your actions on Facebook, including photos, history of posts, and comments to your News Feed, as well as life events that you post and want others to see as a part of your profile. Additions you make to your Timeline may appear on your friends' News Feed. Creates additional links with friends.
Tagging	Ability to tag photos, status updates, check-ins, or comments with the names of friends. Tagging links to that person's Timeline and News Feed. Your friends are notified they have been tagged, and you are linked to their Timeline. Friends of your friends may also be notified. Whenever Facebook detects the person in a new image, it notifies all those who have tagged the photo that this friend appears in a new photo that you can link to. The tagging tool is designed to create additional connections among users.
News Feed	Facebook's News Feed is a continuously updated list of stories from friends, Groups, and Pages that you have liked on Facebook. Ads running in the News Feed are a major ad revenue producer for Facebook. News Feed stories include status updates, photos, videos, links, app activity, and Likes. Provides a continual stream of messages from friends and advertisers.
Groups	Facebook Groups provide a platform for people with common interests to share content with one another. Any Facebook user can set up and manage a group. Groups may be public or private (only open by invitation) or secret (not able to be searched for).
Status update	A way to post your comments, observations, and location to all your friends.
Reactions buttons	In 2016, Facebook redesigned its Like button functionality to add five additional buttons and rebranded it as Reactions. In addition to the familiar Like button, users can now register additional reactions, such as Love, laughter (Haha), surprise (Wow), sadness, and anger.
Messenger	Facebook's instant messaging app, used by over 1.3 billion people every month. Offers a variety of marketing options, including sponsored messages from chatbots, in-box video and display ads, and broadcast messages from small and medium-sized businesses.
Third-party Apps	Third-party apps add functionality to Facebook. Apps run the gamut from games (Candy Crush Saga; Texas Holdem Poker, Words with Friends) to photos (Instagram, now part of Facebook), to music (Spotify). Most apps are free, and most rely on revenues from advertising.
Open Graph	A feature used by app developers to integrate their apps into the Facebook pages of users who sign up for the app, and in that sense, it opens the Facebook social graph to the developer, who can then use all the features of Facebook in the app. For instance, this feature allows your performance on game apps to be sent to your Friend's News Feeds. Supports the development of social apps and increases links among users.
Search	In 2013, Facebook introduced Graph Search, a "social" search engine that searched your social network for answers to queries. It was a semantic search engine insofar as it provided a single answer rather than a list of links based on an algorithm's estimate of user intentions. It was also a hybrid search engine that relied on Bing to supplement results. In 2015, Facebook significantly expanded its Search functionality. It now focuses on keywords and includes everyone's public posts, Likes, photos, and interests (including posts by brands), and makes them available to all users of Facebook, friends or not.

Facebook Marketing

One result is that Facebook is the world's largest repository of deeply personal behavioral information on the Internet. Facebook knows a great deal more about its users than Google does about its users. Second, Facebook's features are built to maximize the connections among people in the form of notifications, tagging, messaging, posting, and sharing. In many instances, the movement of personal information is so widespread that it is beyond the understanding of users and outside observers.

The effect of these two factors is to greatly magnify the social density of the Facebook audience. **Social density** refers to the number of interactions among members of a group and reflects the "connectedness" of a group, even if these connections are forced on users. For instance, some natural groups of people are not very "social" and few messages flow among members. Other natural groups are loquacious and chatty with many messages flowing among members. The scope, intensity, and depth of Facebook's repository of personal information and rich social network present extraordinary marketing opportunities.

Facebook Marketing Tools

Facebook offers a number of marketing and advertising opportunities and tools for branding and developing community on its platform.

TABLE 7.2 BASIC FACEBOOK FEATURES USED IN MARKETING

FEATURE	DESCRIPTION
Profile	As part of account creation, you create a profile that includes certain personal information. The profile may also include photos and other media. Establishes baseline information that will be shared with friends.
Timeline	A history of your actions on Facebook, including status updates, photos, history of posts, and comments, as well as life events that you post and want others to see as a part of your profile. Additions you make to your Timeline may appear on your friends' Feed. Creates additional links with friends.
Tagging	Ability to tag photos, status updates, check-ins, or comments with the names of friends. Tagging links to that person's Timeline and Feed. Your friends are notified that they have been tagged, and you are linked to their Timeline. Friends of your friends may also be notified. The tagging tool is designed to create additional connections among users.
Feed	Facebook's Feed (formerly called the News Feed) is a continuously updated list of stories from friends, Groups, and Pages that you have Liked on Facebook. Ads running in the Feed are a major ad-revenue producer for Facebook. The Feed includes status updates, photos, videos, links, app activity, and Likes. Provides a continuous stream of messages from friends and advertisers.
Groups	Facebook Groups provide a platform for people with common interests to share content with one another. Any Facebook user can set up and manage a group. Groups may be public or private (open only by invitation) or secret (not able to be searched for).
Reactions buttons	In addition to the familiar Like button, users can now indicate additional reactions such as Love, laughter (Haha), surprise (Wow), sadness, and anger.
Stories	Photos and videos that remain visible for only 24 hours. Supports videos of up to 20 seconds; each photo is displayed for 5 seconds.
Reels	Platform for creators (and brands) for short, entertaining video. Appear in Feed, the Reels section, or the Reels profile. Ads can be placed as a banner or a sticker. Video ads can be placed between Reels video.
Facebook Live	Free video streaming service that lets users livestream to a page, group, profile, or event via the Facebook app on a mobile device or using a desktop computer.
Facebook Watch	Video-on-demand service that includes professionally produced original short-form and long-form video, live game shows, news programming, interactive game shows, and more. Facebook Watch offers advertisers both pre-roll and mid-roll advertising options.
Messenger	Instant messaging app, used by more than 1.3 billion people every month. Offers a variety of marketing options, including sponsored messages from chatbots, in-box video and display ads, and broadcast messages from small- and medium-sized businesses.

Facebook Marketing Campaign

If you're new to Facebook marketing, start simple and build on your fan base based on experience. A typical marketing campaign for Facebook might include the following elements:

- Establish a Facebook page for your brand. Content is king: have interesting, original content that visitors can be enthusiastic about. Acquire fans.
- Use comment and feedback tools to develop fan comments. You want visitors to engage with your content. You can also encourage bloggers to develop content for your page.
- Develop a community of users. Try to encourage fans to talk with one another and to develop new (free) content for your page.
- Encourage brand involvement through videos and rich media showing products being used by real customers.
- Use contests and competitions to deepen fan involvement.
- Develop display ads for use on Facebook.
- Develop display ads for use in response to social search queries.
- Liberally display the Like button so fans share the experience with their friends.

Instragram Marketing

Instagram is a visual social network: Users and advertisers post photos and videos to their friends, potential customers, and the public at large. It is predominately a mobile app, but because it is also owned by Meta (Facebook's parent), Instagram content is easily shared to Facebook as well. In 2022, Instagram had more than 1.25 billion users worldwide and more than 200 million business profiles. Almost 60% of Instagram's audi-ence is younger than 35, but its most rapidly growing demographic groups are those comprised of people older than 35.

TABLE 7.4 BASIC INSTAGRAM FEATURES USED IN MARKETING

FEATURE	DESCRIPTION
Profile	As part of account creation, you create a profile that includes certain personal information. Includes a history of photos and videos that you have posted and that others can see as a part of your profile.
Feed	A continuously updated list of posts including photos and videos from friends and brands that you follow on Instagram. Ads running in the Feed are a major ad revenue producer for Instagram. Feed posts can be made shoppable with the inclusion of product tags that let people browse, explore, and purchase without leaving Instagram.
Stories	A feature originally copied from Snapchat. Video, images, stickers, graphics, as well as various forms of interactivity such as polls and quizzes, that remain visible for only 24 hours. Supports videos of up to 20 seconds; each photo is displayed for 5 seconds. More than 500 million people use Stories every day. Stories Highlights enables Stories to be saved at the top of the profile page.
Instagram Live	Part of the Stories feature. Live broadcasts.
Instagram Video	Combines IGTV and long-form, in-feed videos. Houses all video content except Reels.
Reels	Platform for creators (and brands) for short, entertaining videos. Appear in Feed, the Reels section, or Reels profile. Ads can be placed as a banner or sticker. Video ads can be placed between Reels videos.
Tagging/Tagged tab	Ability to tag photos with the names of friends. Tagging links to that person's account and Feed. Your friends are notified that they have been tagged. The tagging tool is designed to create additional connections among users. The Tagged tab shows all the posts that other users have tagged you in.
Hashtags	A combination of letters, numbers, and/or emoji preceded by the # symbol, used to categorize content and make it more discoverable. Anyone who clicks on an Instagram hashtag or conducts an Instagram hashtag search will see a page showing all posts tagged with that hashtag. Can be used to build community, expand audience, and get more reach.
Filters	Offers 40 different photo filters that enable brands to create different looks and feels for their photos. Augmented reality (AR) filters are also available.
Instagram Direct	In-app messaging that allows brands to privately exchange text, photos, posts, and Stories with one or more people, thus strengthening customer relationships and increasing sales via personal connections.

Instragram Marketing Tools

Similar to Facebook, advertisers on Instagram have brand profiles and run marketing cam-paigns by sending posts to users' Feeds. Instagram ad campaigns consist of display ads and video ads of exceptional quality, similar to those in a printed magazine. Carousel ads can include multiple still photos or videos in a single ad. Ads can link to advertisers' websites and now can include a Buy button. Instagram also offers Stories as a paid advertising prod-uct. Instagram Stories typically include a montage of images and/or videos, sometimes annotated with graphics and emoticons, and disappear after 24 hours. Major brands have eagerly embraced the format and regularly include Stories in their Instagram marketing efforts. Influencer marketing is also a major method of marketing on Instagram.

Instragram Marketing Campaign

Prior to starting an Instagram marketing campaign, you should address all of the same basic strategy questions that you would address when starting a Facebook marketing campaign. After you have done so, here are some basic steps and elements involved in a typical marketing campaign on Instagram.

- Set up a free Instagram business profile. If possible, get verified, which helps to establish trust with potential customers. Choose a high-quality photo, and include a call to action to click the profile's bio link. Make sure that the bio provides an engaging summary of your brand.
- Try an Instagram ad. You can turn any existing Instagram post into an ad by using Instagram's Boost Post functionality.
- To launch a full Instagram ad campaign, connect the Instagram account to Meta Business Suite, which enables you to choose various goals, such as building brand awareness, getting more website visitors or purchasers, getting more leads, and so on.

Instragram **Marketing Campaign**

- Create the ads. Instagram provides prompts to help with this process, depending on the goal that you select. Typically, ads include a mixture of photos, videos, Stories, Reels, and, if you sell products online, catalog and shopping ads.
- Set the budget and duration. Instagram will provide a prediction of results in terms of estimated reach and clicks.
- Partner with influencers to extend your reach.

TikTok Marketing

TikTok is one of the newer social networks. Launched in 2017, TikTok is a short-form video sharing app owned by Chinese company Bytedance. It already has more than 800 million active monthly users worldwide, with about 95 million in the United States. Many TikTok videos feature music, with users lip-syncing, singing, and dancing; others focus on comedy and creativity within the 15-second limit of each video. Users can "remix" posts from other users and put their own spin on them using the app's array of editing tools, filters, and other effects. Algorithms analyze the viewing habits of each user and provide content that is customized based on their activity. TikTok skews much younger than the other social networks.

TABLE 7.6 BASIC TIKTOK FEATURES USED IN MARKETING

FEATURE	DESCRIPTION
Profile	User account, including bio with link to website
For You Page and Algorithm	TikTok's For You Page is determined by an algorithm that makes content recommendations that are personalized for each user. The algorithm is based on the user's video likes and shares, accounts followed, comments posted, content created, videos completed, and videos that are favorited by the user. The algorithm is a important component in the ability of certain videos to "go viral."
Tagging	Ability to tag other accounts, such as influencers and content creators. Also useful when reposting user-generated content in order to give credit to original creators.
Hashtags	A combination of letters, numbers, and/or emoji preceded by the # symbol that is used to categorize content and make it more discoverable. Anyone who clicks on an Instagram hashtag or conducts an Instagram hashtag search will see a page showing all posts tagged with that hashtag. Can be used to build community, expand audience, and get more reach.
Filters and Effects	TikTok offers traditional filters that can change the color tone of videos and photos, as well as many interactive effects such as the green screen filter effect that enables a creator to add a custom background. Has also added new augmented reality effects.
Stitch and Duet	TikTok features that enable users to interact with videos. Stitch allows users to cut and edit other people's videos and incorporate them into their own content. Duet is an editing format that enables users to combine two videos in a split-screen format.

TikTok Marketing Campaign

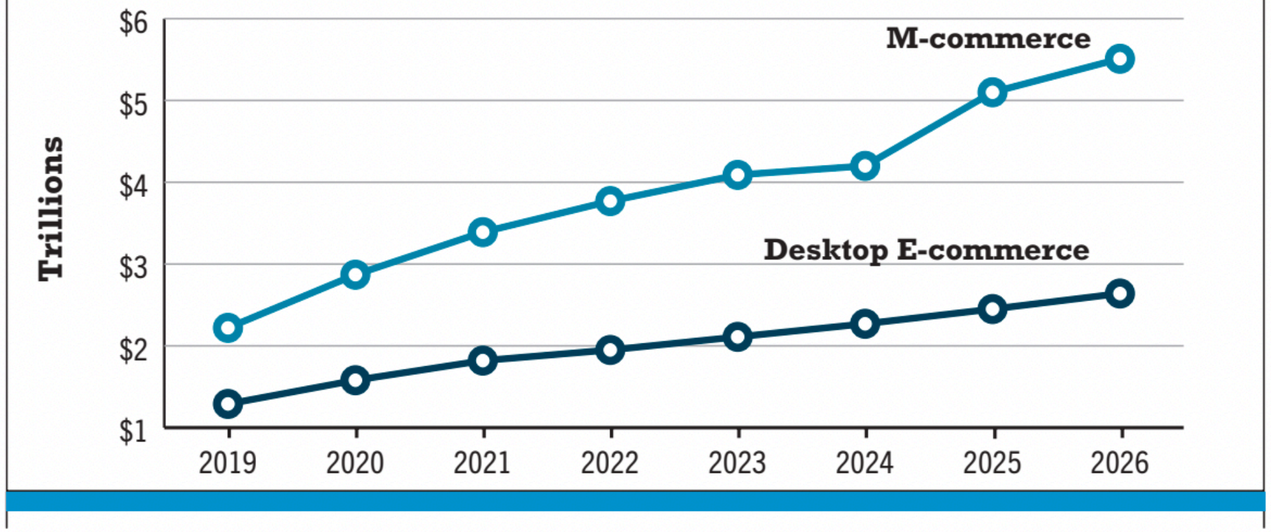
TikTok is very different from Facebook, Instagram, or Twittter, It has a number of unique features, such as the TikTok algorithm, as well as unique user demographics (the majority of its users are younger than 30) and behaviors. Although TikTok now offers a variety of advertising options, marketing on TikTok is driven primarily by influencers and viral videos. To start a TikTok marketing campaign:

- Create a profile.
- Start creating and posting video content, paying particular attention to hashtags, filters, and effects.
- Partner with creators and influencers.
- Comment regularly, and encourage comments in your posts.
- Launch organic hashtag challenges, including social media contests to encourage participation.
- Start trying some of TikTok's ad formats, such as in-feed ads, and for larger companies, brand takeovers, TopView ads, and Branded Hashtag Challenges.

Mobile Marketing : M-Commerce

Initially, m-commerce was focused primarily on digital goods, such as music, vid- eos, games, and e-books. Today, however, traditional retail products and travel services are the source of much of the growth in m-commerce.

FIGURE 7.5 THE GROWTH OF RETAIL M-COMMERCE WORLDWIDE COMPARED TO DESKTOP E-COMMERCE



Retail m-commerce is expected to grow to around $5.3 trillion worldwide by 2026.

SOURCE: Based on data from Insider Intelligence/eMarketer, 2022i, 2022j.

Mobile Marketing Campaign

As with all marketing campaigns, start by identifying your objectives and understanding just how a mobile marketing campaign might help your firm.

Next, consider the target demographic for your campaign and products. The most active purchasers on mobile devices are men, and they are more likely to buy consumer electronics equipment and digital content. Women are more likely to cash in coupons and respond to flash sales and deals. Younger consumers are more likely to research products and price on mobile devices, and more likely to share experiences using social media.

Finally, consider the marketspace where you hope to succeed. Once you have envisioned your marketing campaign and identified your market, it is time to start implementing your mobile campaign. Here are some steps to follow:

Mobile Marketing Campaign

- Develop a mobile website so mobile consumers can see and buy your products. Make your mobile website social by including links to Facebook, Twitter, Pinterest, and other social networks.
- Develop a Facebook brand page so your social and mobile marketing efforts are integrated.
- Develop a Twitter brand page so customers can follow your posts.
- If you already use a display advertising program like Google's AdWords or a Facebook display ad account, you can create a new campaign using the same ads designed specifically for mobile platforms.
- Consider opening a Google AdMob account, in part because ad networks can publish and track your ads on multiple platforms simultaneously.
- Develop marketing content that is aimed specifically at the mobile user, with videos and high levels of interactivity designed for the mobile screen.

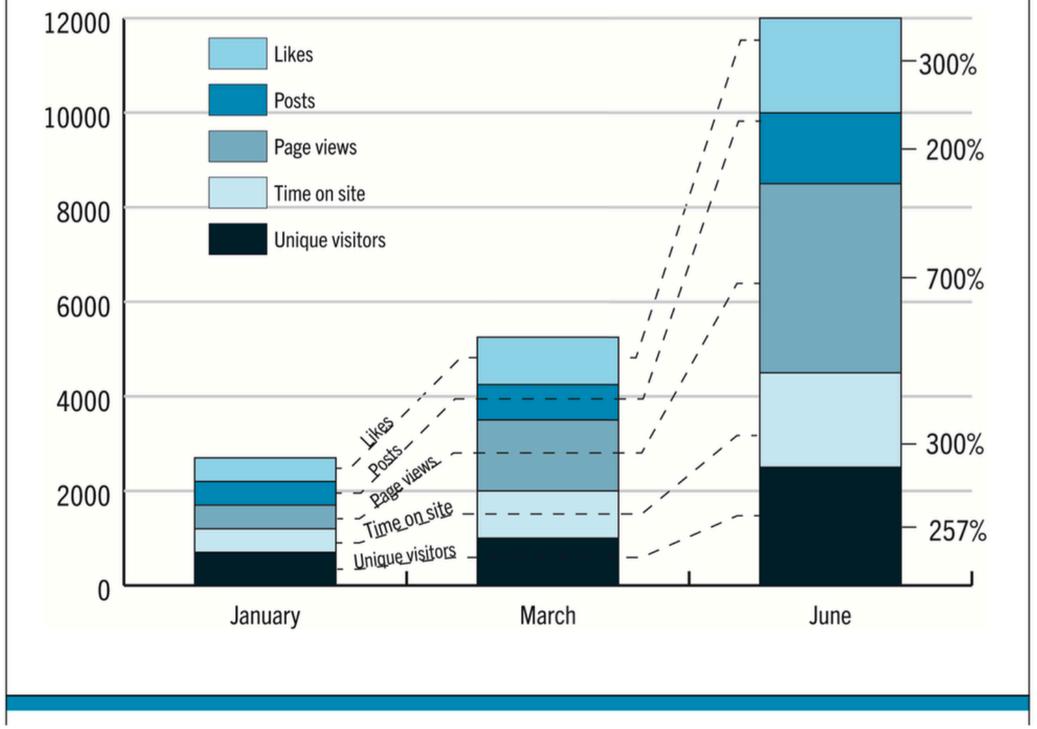
Mobile Marketing Campaign

- Measure and manage your campaign. Google's AdWords, along with many other ad networks, will host and manage your mobile campaigns. In addition, they can provide you with a host of campaign measures that will allow you to see which mobile ads and techniques are attracting the most followers, comments, and social activity concerning your brand. With this basic data you can start to manage the mobile marketing campaign by reducing expenditures on ads that do not work and increasing the budget of ads that do work.

Measuring Mobile Marketing Results

There are many different mobile marketing objectives, and therefore different types of mobile marketing campaigns. Some campaigns are sales-oriented, based on display and search ads, offering coupons or discounts, and taking users directly to a website where they can buy something. Measuring the results of these mobile campaigns follows similar campaigns launched on desktops.

FIGURE 7.10 **MEASURING THE EFFECTIVENESS OF A MOBILE AND SOCIAL MARKETING BRANDING CAMPAIGN**



The effectiveness of a branding campaign utilizing the mobile platform and social marketing can be measured by examining the number of Likes, posts, page views, time on site, and unique visitors.

Local and Location-Based Mobile Marketing

Location-based marketing is one of the fastest growing segments of the digital marketing universe. **Location-based marketing** targets marketing messages to users based on their location. Generally, location-based marketing involves marketing of location-based services. **Location-based services** involve providing services to users based on their location.

Examples of location-based services are: personal navigation (How do I get there?), point-of-interest (What's that?), reviews (What's the best restaurant in the neighborhood?), friend-finder (Where are you? Where's the crowd?), and family-tracker services (Where is my child?). There is a connection, of course: the more people use their mobile devices to search for and obtain local services, the more opportunities there are for marketers to target consumers with messages at just the right moment, at just the right location, and in just the right way—not too pushy and annoying, but in a way to improve the consumer experience at the moment of local shopping and buying.

Location-Based Mobile Marketing : Technologies

There are two general types of location-based marketing techniques: geo-aware and proximity marketing.

- **Geo-aware** techniques identify the location of a user's device and then target marketing to the device, recommending actions within reach (which, in itself, requires the marketer to know where relevant things like stores are located). For instance, a marketer may target smartphones within several square city blocks to alert them to available offers from participating merchants.
- **Proximity marketing** techniques identify a perimeter around a physical location, and then target ads to users within that perimeter, recommending actions possible within the fenced-in area (geo-fencing).

Location-Based Mobile Marketing : Technologies

TABLE 7.15 MAJOR LOCATING TECHNOLOGIES

TECHNOLOGY	DESCRIPTION
GPS	The user's device downloads GPS data from a GPS satellite. First introduced with the Apple 3G iPhone in 2008. Today, cellphones are required to broadcast their GPS location for emergency assistance purposes.
Wi-Fi	Estimates user's location within a radius of a known Wi-Fi access point.
Bluetooth low energy (BLE)	Used by Apple in iBeacon. Uses less battery power than traditional Bluetooth or GPS and more accurate than targeting through Wi-Fi triangulation.
Geo-search	Uses location information based on the user's search queries.
Cell tower	AT&T, Verizon, and other carriers are in constant contact with their devices, which allows approximation of location by triangulation and refinement of the unit's GPS location. Wireless carriers use a cell phone's MAC address to identify the phone and the location.
Sign in/registration	Estimates users' location when they self-identify their location using sign-in services or social network posts.

Location-Based Digital Marketing Features

Location-based services involve providing services to users based on their location.

TABLE 7.16 LOCATION-BASED MARKETING TOOLS AND CAMPAIGNS

LOCATION-BASED MARKETING TOOLS	DESCRIPTION
Geo-social-based services marketing	Users share their location with friends. Can be used for check-in services like Foursquare; friend finders; transportation services.
Location-based services marketing	Provides services to consumers looking for local services and products.
Mobile-local social network marketing based on users' location	Facebook expands offerings of deals by local firms, display ads using News Feed. Facebook Marketplace enables people to easily buy and sell within their local communities. Foursquare app Swarm focuses on social updates from specific locations and sending recommendations and deals. Social network monitoring: sends messages within an app based on mentions of interest in products in Facebook and Twitter posts. MomentFeed allows marketers to listen to social chatter on social networks by location, then target consumers with geo-specific ads. Used by Pizza Hut, Starbucks, and local restaurants. Intent marketing: scanning social networks for indications of real-time consumer interest in specific products.
Proximity marketing	Send messages to consumers in the area of a store or outlet to generate sales using a virtual fence around a retail location (could also be an airport, train station, or arena). Generally opt in. Whole Foods places geofences around its stores to target ads and offers to mobile users passing by.
In-store messaging	Messaging consumers while entering or browsing in a store. Retailers collect, analyze, and respond to customers' real-time shopping behavior. Macy's, Lord & Taylor, and Target use beacon marketing to greet customizers and offer deals.
Location-based app messaging	PayPal's mobile app detects customers near a store that offers PayPal payment options and entices them with offers to visit.

Proximity Marketing with Beacons?

https://www.youtube.com/watch?v=Q7nE1SWG7M4

Location-Based Marketing Campaign

As with all marketing campaigns, start by identifying your objectives and understand just how a location-based mobile marketing campaign might help your business. Location-based marketing is generally much more action-oriented than other forms of online marketing. A person is in a given location only for a short time, measured in minutes and hours, rarely days or weeks. If you want the consumer to do something, it's now.

Next, consider the target demographic for your campaign and products. Location-aware consumers (those with mobile devices and familiar with location-based services) tend to be a younger, more educated, and wealthier demographic. They have many of the same characteristics as all mobile shoppers.

Once you have envisioned your marketing campaign and identified your market, it is time to start implementing your mobile campaign. The same steps that you would follow in implementing a mobile campaign apply to location-based marketing as well.

Measuring Location-Based Marketing Results

There are a great many ways to measure the success of a mobile location-based cam- paign, some very sophisticated. The measures of success will vary depending on the objective of the campaign, which might be to raise the awareness of your brand among consumers, to bring customers to your retail store, or a click-to-call campaign where you want people to make reservations for a concert.

TABLE 7.17 MOBILE LOCATION-BASED MARKETING EFFECTIVENESS

MARKETING PROCESS	MEASUREMENT
Acquisition	Impressions; click-through; unique visitors to a mobile or desktop website or app; pages viewed; time on site.
Engagement	Inquire; reserve; visit a physical store; click-to-call; check maps for directions; register; request more information; posts and comments; responders to offers; Likes generated per visitor; click-to-call rate.
Amplification	SMS to friends; notify friends of location; share location or offers with friends.
Community	Content generated by visitors or responders; reviews; posts; positive comments generated.
Sales	Purchases; percentage increase in sales due to local mobile campaign; percentage of customers from local mobile.
